Average Field Life: 10 to 15 Years

Approx. Percent Solid: 8 %

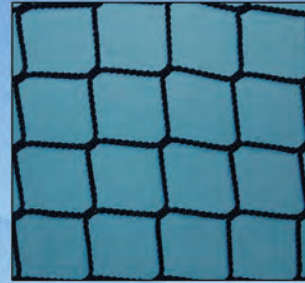

1.800.541.1123

Poly 2000

TEX-NET Golf Barrier Netting

POLY 2000

Bordered to fit for quick installation, this net has a bursting strength of 450 lbs. The UV impregnated high tenacity polyester engineered fiber is manufactured exclusively for Tex-Net. With a twist in the yarns we have added tensile strength while maintaining a low coefficient of drag and minimal wind load. This ultimately translates to a stronger net without added support structure.

TEX-NET CAN FURNISH COMPLETE OR PARTIAL PACKAGES INCLUDING ALL NET, HARDWARE, AND POLES. TURNKEY INSTALLATIONS AVAILABLE NATION WIDE.

POLY 2000 Specification Information:

Product: 1" Mesh Golf Range Netting

Fiber: Hi-Tenacity Polyester

Color: Black

Construction: Warp Knit "Knotless"

Break Strength: 150 lbs.

Burst Strength: 450 lbs.

UV Stabilizer: Impregnated Black Carbon

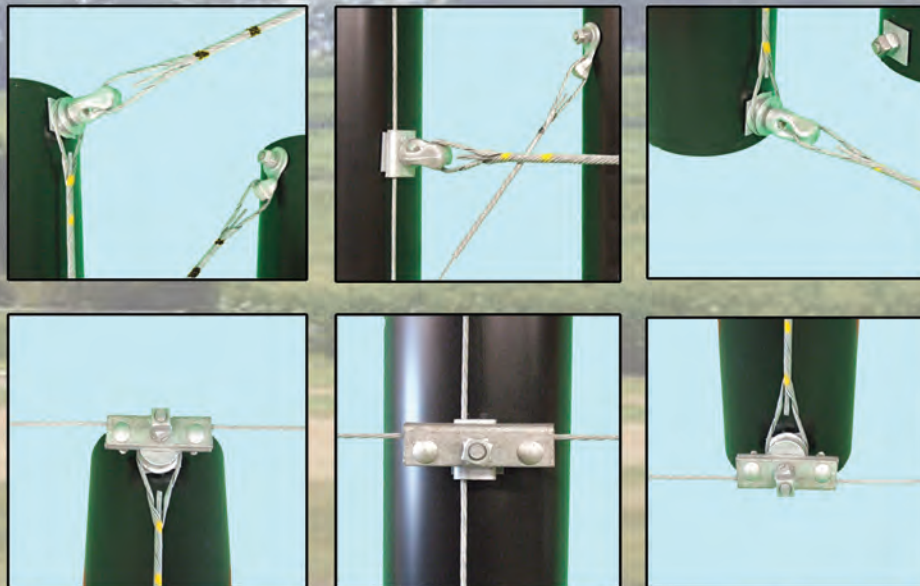

Average Field Life: 10 to 15 Years

POLY 2000 HAS PROVEN ITS LONGEVITY AS HIGH AS 150' ABOVE GROUND LEVEL.

Hardware

Hardware Overview

Tex-Net stocks all required hardware and cable.

Golf Cages

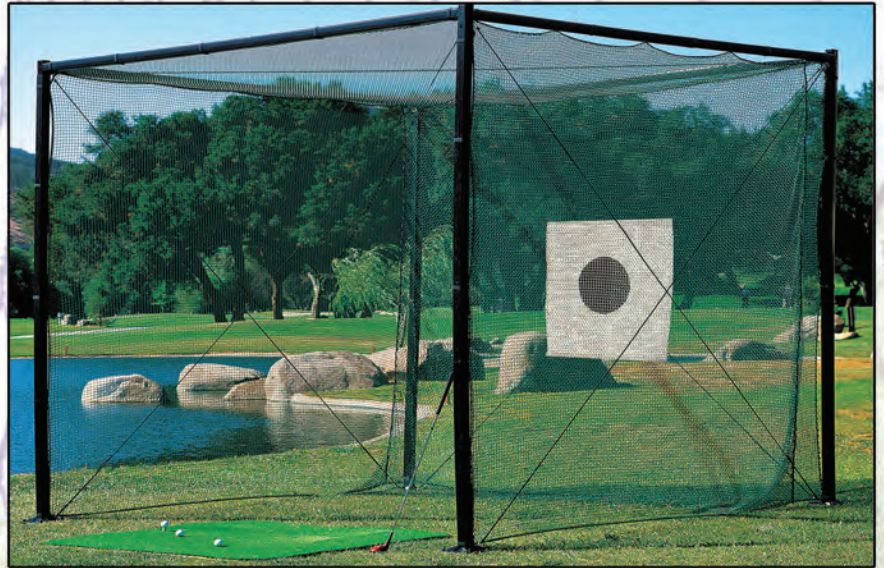

TEX-NET Practice Cages

PowerCage

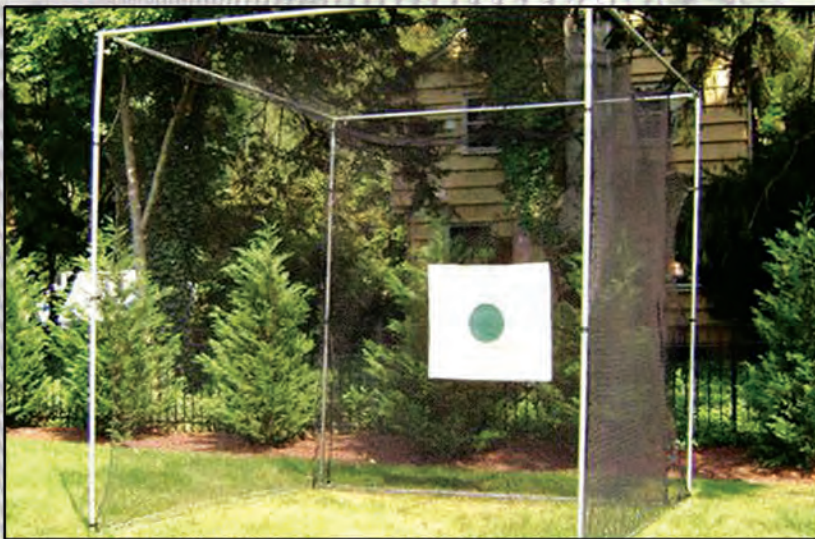

The standard in practice cages. Power Cage is the ultimate hitting cage. Here's a cage setting a new standard in the industry. Light, strong and durable, you can assemble Power Cage in minutes without the need for tools. Power Cage is the leader in Golf Practice cages.

Six reasons why Power Cage is the best...

1. Symmetrical snap lock corner brackets for rigid corners and fast assembly.
2. Snap lock coupling for ease of assembly and take down of framework.
3. 2 1/4" x 5' Reinforced Hi-Tech polycarbonate posts with coupling guides for strength.
4. 10 1/2" Foot bezel with reinforced ground spike guides for stable outdoor use.
5. 7/8" black polyester netting with ultraviolet inhibitor for long outdoor life.
6. 7/8" heavy duty baffle net 12" from wall for added protection with adjustable target.

10' High x 10' Wide x 10' Deep

10' high x 10' deep x 10' wide, Height Adjustable

Pro Cage

"The Pro-Cage" features the Heavy Duty Net of "Power Cage" and the steel frame of the "Par-Cage". This standard 10' High x 10' Deep x 10' Wide is height adjustable and perfect for year round use in or outdoors. "The Pro-Cage" comes with the net built in one piece with rope edges and the baffle net is stitched into both sides and top. Velcro straps are used to wrap around the net and frame for quick setup and take down.

TEXNETUSA.COM

Short Range

Custom Driving Solutions

Short Range

Tex-Net has developed a short range solution that maximizes all of your available space. The netting is suspended from engineered anchorless steel pole systems to create an enclosed practice area. The six-station 35-foot-tall and 60-foot deep cage offers golfers full swing, chipping and sand bunker practice and a lesson area that was previously not available.

No Ceiling Design

Tex-Nets golf cages start at a standard size of 10 high by 10 wide by 10 deep. Your only limitation to our custom cages is the space that you have to work with. Wood or Steel poles with an optional pulley system can be designed for bad weather conditions.

1.800.541.1123

Baseball Netting

TEX-NET Foul Ball Control

Baseball Netting

Foul ball netting , spectator, overhead nets, dug out covers and backstops on the practice fields or in the stadium , Tex-Net can easily solve errant ball control problems. Tex-Net can professionally furnish and install complete packages including all net panels, hardware and poles. Hundreds of our net panels have been installed on existing lighting poles. Check with your lighting installer for engineering requirements. We recommend that nets on light poles be retractable and removed during heavy weather. Polyester or Nylon, Permanent or Retractable, we have the right product for your application.

Backstop and Foul Ball Netting

Tex Net offers Backstop and Foul Ball Netting in three (3) weights for medium, heavy duty, and professional grade applications. The netting is 1 3/4 "square mesh knotted nylon that is bonded and dyed black to help block out the sun's harmful UV rays.

1.800.541.1123

Baseball Netting

TEX-NET Batting Cages

100% Custom Nylon Batting Cage Nets, Frames, & Hardware

All of our nets are constructed of Knotted Square Mesh Nylon.

All four sides are Rope Bordered with an additional rope added along the top center line of the cage to make installation a breeze.

All cages come with a 6' entry flap for ease of entry and exit, and include a lead core bottom rope to help keep the nets from moving during use.

Our nets also come bonded and dyed with a black UV Treatment to help ensure a longer life by blocking out the sun's damaging rays.

Tex Net offers three (3) styles of cage netting in this series. The # 21 Medium Duty is designed to accommodate the little league up to the high school users. The # 36 Heavy Duty is made to handle the College and University level, and the # 42, our most durable, is made for the minor and major league ball fields.

Tex Net also offers our Premium Line of Batting Cage Frames to accompany all of our Pro Series Nets. We have two (2) sizes available. The Three (3) section frame fits our 55' cages, and our four (4) section frame fits our 70' cages. All of our cage frames are constructed of 2 1/4", 14 gauge, square galvanized steel and come complete with the following installation kits for the "Do It Yourself".

All kits include uprights, cross-members, steel ground sleeves, cables, clamps, eye-bolts, turnbuckles and snap hooks.

Tex Fence Fabric Fencing

Sports-Crowd Control-Amusement Parks-Ski Slopes

Tex-Fence

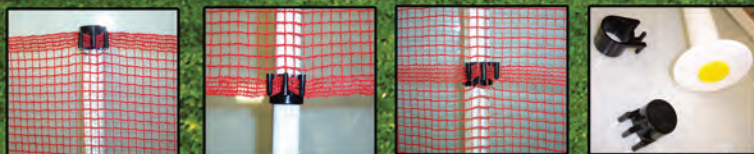

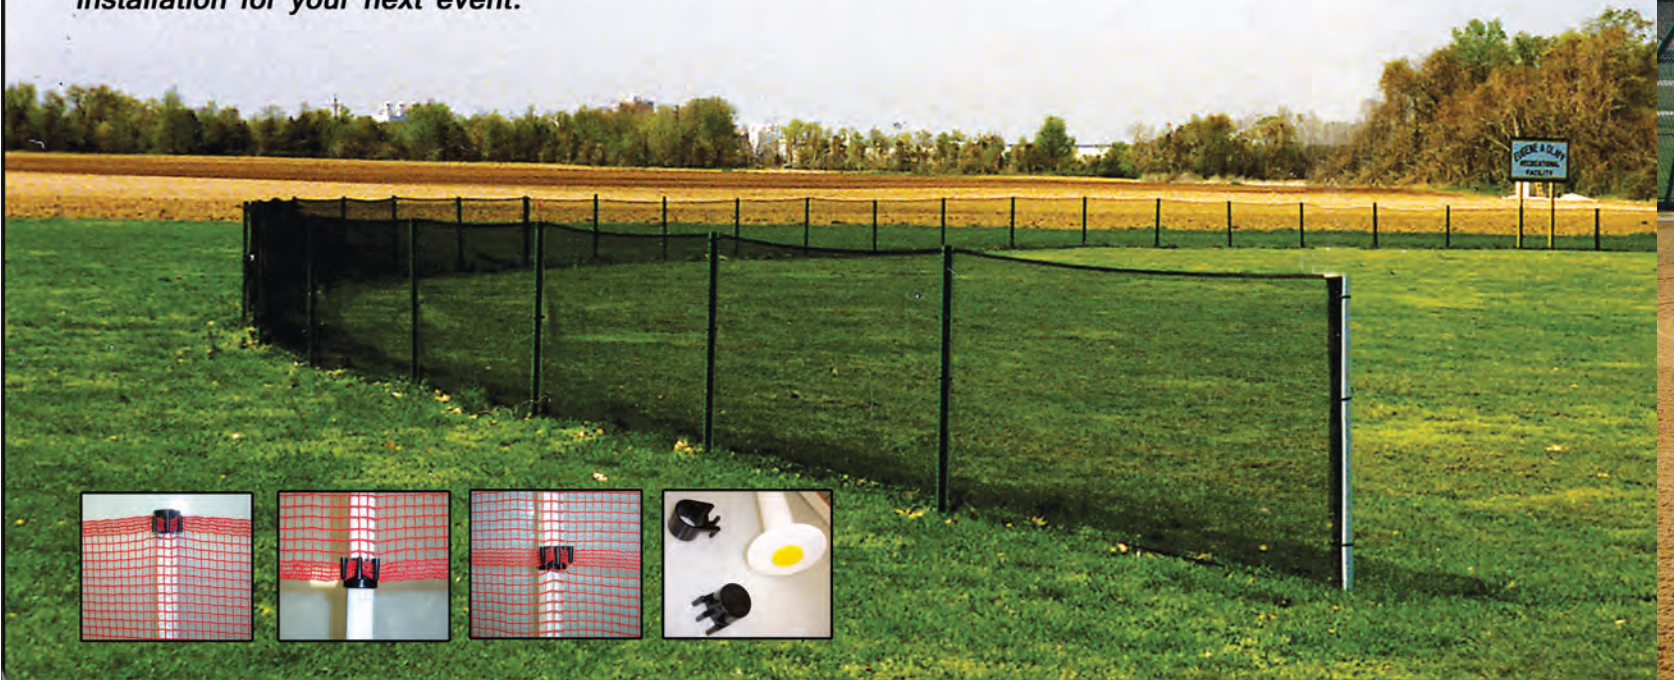

Celebrating nearly 30 Years of production. Designed and placed in production in 1986 By: TEX-NET, Tex-Fence continuously shows its true colors and reliability throughout the country. Intended as a low cost fencing system alternative to standard 4" chain link. TEX-FENCE proudly stole the spot light from other fence manufactures at the 2001 Olympic Games, The PGA Tour and the Woman's National Softball Championships. Light weight, easy to handle and affordable, Tex-Fence has proven to be the #1 choice for temporary and permanent fencing systems.

Multiple Color Options !

Utility and Sport Fence Packages

Sports Fence packages can be used for Baseball & Softball Outfield Fences, Spectator and Crowd Control Events and many other applications. The fencing is installed on a "Smart Pole System" that allows for easy installation and removal when not being used. The packages come with ground sleeves and caps as well as the necessary tools for the installation. The ground sleeves are inserted 1" below ground level and can be left after each use by simply inserting a sleeve plug cover into the sleeve to keep dirt and other debris from filling up the opening. After removing the poles from the ground sleeves you can leave them attached to the fencing for storage and quick installation for your next event.

Portable Fence System

"The Trash Trap"

Flying Litter

The "Trash Trap" Litter containment unit was designed for the disposal industry to contain trash in a specific work area. It's all steel frame construction makes it easy to relocate at any time by simply towing it with the landfill's equipment. The "Trash Trap" is available in 20, 30, and 40 ft. lengths, and can be ordered in 12 or 16 ft. heights.

Designed to catch flying litter and force it back down to ground level for easy retrieval. Each "Trash Trap" comes with a heavy duty polypropylene 1" mesh net with rope boarded edges for easy installation and towing cables to easily move and relocate your unit.

Netting Specification Information:

Burst Strength: 225 lbs.
UV Stabilizer: Impregnated
Average Field Life: 10 to 12 Years
Approx. Percent Solid: 16 %

1.800.541.1123

Litter Fence

TEX-NET Debris Netting Systems

Debris Netting Systems and Landfill Fencing

Netting For Landfills... Does It Work? In fact, litter retrieval labor cost count for a significant portion of operating expenses. Installation of this type of system will help lower those costs and often pay for itself in a very short period of time. Make chasing paper and plastic all over the countryside a thing of the past. Call Tex-Net today for your free no hassle quote and see how easy it will be to lower your operating costs. Keep your crews working on what's really important.

Our Unique Kicker Systems

Standard netting systems work fine to keep flying debris in place up to a point. In standard netting installations flying debris will be stopped and contained. However it's not uncommon to see some lighter materials such as plastic bags roll up and over the top of the net. This is where our unique kicker system takes over by stopping and holding debris in place. Once the wind dies down the materials simply fall back to the ground.

POLY 1000 Specification Information:

Product: 1" Mesh Netting

Fiber: Polyester

Color: Black

Construction: Warp Knit "Knotless"

Break Strength: 105.3 lbs.

Burst Strength: 300 lbs.
